Pocket Notebook, PN-73-00-00.2

This undated notebook contains notes and drawings made by Edison during his trip to England in the spring of 1873. There are drawings of telegraph equipment, circuit diagrams, and notes on experiments. The book also contains a note on overhead wires in England and a list of English telegraph instrument manufacturers. Approximately 60 pages of this unnumbered book have been used. Several leaves have been torn out.

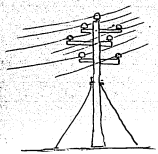
The wires from London to Liverpool are the best strung wires I ever saw.



15 X 20 wires on one short pole
